- Vendor/ Contractor

**According to PA 174 of 2013 Section 7(8)**

“New facilities built after the effective date of this act shall be constructed in a manner that allows their detection when in use”

**According to The Michigan Damage Prevention Board Best Practice 2014-02**

“Requirements for Detection of New Facilities for Purposes of Locating” describes acceptable methods for facility detection.

### Committee Participation

Michigan Damage Prevention Board (MDPBB) is in place to review any comments or concerns from the Damage Prevention Associations.

Michigan Utility Coordination Committee (MUCC) meets to discuss pre-construction underground utility safety through planning and communication including post construction and as-built drawings and standards.

The Michigan Utility Coordination Committee's (MUCC) Geospatial Utility Infrastructure Data Exchange (GUIDE) initiative revolutionizes spatial awareness and spatial quality of underground utility infrastructure information by capturing accurate 3-dimensional geospatial location data on underground utility infrastructure at the time of installation, and storing this information in highly accessible and secure repository.

Ticket Initiation Management Execution (TIME) Committee discusses possible changes to MISS DIG ticket and transmission formatting and uses.
