Ali Bronson, Kent Power
Melissa Franks, Newkirk Electric
Jack Hindes, USIC
Dan Sorek, Prein & Newhof
Linda Portelli, MISS DIG 811

ABSENCES: Matt Weldon, at training in Lansing

PRESENTATION: Scope of Work

DISCUSSION: MISS DIG 811 had a short presentation about Scope of Work which is a MISS DIG 811 procedure regarding the extent of work you can place on a single ticket to create a reasonable request that can be responded to within 3 business days.

Jane suggested to have no topic next month and to have the locators tell her what they need or would like to discuss. She will put together and let me know before the next meeting. It was discussed to move the May meeting to April, in hopes of having a better turnout before the busy digging season starts.

ISSUES: After the presentation, there was some discussion about AT&T clearing tickets where they have lines and getting sites marked. Bill Strandberg from Newkirk Electric asked if on a project ticket, if you started excavation with 14 days but were called off job so not digging consistently, can you still call in for destroyed markings? You can.

Can you print excavator responses? Yes, by clicking on View Excavator Responses and then Print.
