

TO: MISS DIG 811 Users
FROM: Bruce Campbell, CEO
DATE: April 15, 2020
SUBJECT: DAMAGE PREVENTION MESSAGE

We will all soon be [returning to work](#) at the same time. This includes those who have patiently delayed projects, as well as those who were forced to halt in-progress projects. With that in mind, we may find that there is much to accomplish within a short period of time and feel the need to complete these jobs quickly and efficiently. As a reminder, think safety first and follow five steps of safe digging:

1. Call MISS DIG at 811 or go online before you dig! [Plan ahead](#).
2. Wait for utilities to be marked.
3. Check Positive Response.
4. Respect the marks. Hand dig and expose lines.
5. Dig with care after the legal start date and before 14 days to avoid retransmits.

Reach out to MISS DIG 811 for additional assistance, if needed. Don't take short cuts and stay safe.
