COVID-19 WORK TYPE UPDATE
TEMPORARY EMERGENCY MEDICAL SITE

In response to the requirement that essential businesses screen employees prior to entrance to work sites, MISS DIG requests that all companies installing temporary emergency medical sites or overflow areas use the following verbiage:

RTE users: In the Work Type field enter, "Temporary emergency medical site."

Calling 811: Let the NSR know that the Work Type field should read "Temporary emergency medical site."

If you are currently not an RTE user or are a basic RTE user who would like training for emergency use, please contact Stephanie at sboe@missdig811.org.

If you have additional questions or concerns, please contact Bruce at bcampbell@missdig811.org.
